The diagram illustrates an optical system for a projection display. Light from a source 100 passes through a lens 11, a prism 12, a beam splitter 45, a lens 13, a lens 15, and a lens 20. The light is reflected by a mirror 16 and a lens 19 to form an image on a screen 23. A lens 22 is also shown in the path.

F I G . 28

FIG. 28 is a cross-sectional view of a curved structure, such as a laser module component, showing a coordinate system with X, Y, and Z axes. The Y-axis is perpendicular to the page, the X-axis is vertical, and the Z-axis is horizontal. A dashed line indicates the 'DIRECTION OF CUT' at an angle $\theta = 87^\circ$ from the Z-axis. The curved surface is dimensioned as 16".
